AVOID SEDATIVE COUGH

It you want to contribute directly
to the occurrence of capillary bronchi-
tis and pneumonia use cough medi-
cines that contain codeine, morphine
heroin and other sedatives. When
you have a cough or cold, an expec-
torant like Chamberlain's Cough Rem-
edy is what is needed. That cleans
out the culture beds or breeding pla-
ces for the germs of pneumonia and
other germ diseases. That is why
pneumonia never results from a cold
when Chamberlain's Cough Remedy
is used. It has a world wide
reputation for its cures. It contains
no morphine or other sedative. For

THE Bowling Green Times editor-
ially says: "R. M. White has round-
ed out his 57th year as editor of the
Ledger. During that time he has al-
ways been in the lead in every en-
terprise leading to the betterment of
Mexico. We are informed that while
like to be able to enumerate some
of the many good things accomplished
by Mr. White's untiring efforts.
He is appreciated! Yes, in a meas-
ure, but most of those who stood
with him when a victory was to be
won for the city, have gone to the
reward. It was not always
smooth sailing. A newspaper man is
compelled to take a stand and speak
his sentiments. He was often un-
derstandably and unjustly criticized
for his progressive spirit, but a big,
clean Mexico—one of the best towns
in the State—stands as a monument
to his untiring efforts. "Well done,
thou good and faithful servant." You
may not get credit here, but there is
a recording secretary who never for-
gets the man who works to build up
his home town. He stands out for
loyalty for one of the best things Mex-
ico could adopt—local option, and
he is making a clean and clear-cut
fight for the homes of those who
are unfortunate in life's battle."

C. W. Pease, who owns a 525-acre
farm near Mexico, Mo., has a large
modern house and other farm im-
provements which compare favorably
with it. The house has 12 rooms, and
there is a basement under the en-
tire building. It is modern in ev-
ery respect, has furnace heat, hot
and cold running water and skylight
lights. There are two deep wells
drilled for the power for the building.
The power for the pumping being fur-
nished by a gasoline engine for one
and a windmill for the other.

Cattle feeding is the main line on
this farm, and the barns are especial-
ly constructed for this purpose. The
cattle barn is 58 by 60 feet, and the
corn crib will hold 10,000 bushels of
corn. There is a machinery shed
built with the corn crib.

The buildings are a splendid ex-
ample of carefully constructed im-
provements, which have been plan-
ned for a special type of farming.
They also prove that one can have
in the country, if the owner will put
them in, the same as in the lead as
